## Health Intelligence Gender Pay Report Data Context:

- The mean average at Health Intelligence shows men are paid $30.2 \%$ more than women. The higher average pay for men at Health Intelligence correlates with the higher proportion of men in senior roles, with $24 \%$ more men and $24 \%$ less women in the upper pay quartile than in the lowest pay quartile.
- $13.1 \%$ more men receive bonuses at Health Intelligence. This data includes sales commission payments, of which the single eligible role is held by a man.
- Bonuses for men are on average $43 \%$ lower at Health Intelligence than those for women. This shows that although more men as a percentage received bonuses, the average value of the bonus payment received was less than that of the women in receipt of a bonus. This is because Health Intelligence bonuses during this period are linked to the mobilisation of new contracts and these employees made most impact upon them.
- The overall percentage of roles split by male and female employees at Health Intelligence is $23.5 \%$ and $76.5 \%$ respectively.
