

# NHS Health Check Reporting

*“All patient data being available within a secure and patient consent compliant register with advanced reporting capabilities, has enabled us to identify a range of business and clinical benefits”*

**Barbara Yates, Primary Care Information Manager, NHS Walsall**

## Overview

Health Intelligence has developed a comprehensive solution in support of all stakeholders involved in the provision of the NHS Health Check programme.

Our analytics solution will support you in meeting the targets set by Public Health England.

## Features

- ✓ Supports the delivery of a NHS Health Check in both GP Practice and Community environments
- ✓ Establishes an accurate cohort of eligible patients
- ✓ Prioritises “high risk” patients for systematic invitation process
- ✓ Simple process to monitor patients from invitation through to recall
- ✓ Monitors interventions, treatment and outcomes
- ✓ Supports a wide variety of CVD risk algorithms
- ✓ Automatically produces National Minimum Data Set (MDS) reports for Commissioners
- ✓ Bespoke reports to enable commissioners to monitor any Local Incentive Schemes

- ✓ Provision of GP clinical system templates to support the delivery of a NHS Health Check
- ✓ It is a secure data capture tool for community/pharmacy based NHS Health Checks
- ✓ Assist in targeting community based locations for specific cohorts of patients

## Benefits

- ✓ Fully managed service, with access to friendly customer support
- ✓ Reduces administrative time for both GP Practices and Local Authorities
- ✓ Quality and consistent data
- ✓ Provides confidence in robust figures for Public Health England and any incentive schemes released by Local Authorities
- ✓ Identification of previously undiagnosed patients and ensures that only eligible patients are invited
